

WINNER OF MULTIPLE AWARDS

aktiv Radfahren (Issue 03/2019 – *The Super Cleaners*): BikeClean bike cleaner is the value for money winner in a comparison with 14 competitors. Conclusion: „Ballistol gets a lot of things right: good cleaning performance, top quality bottle, spray pattern and adhesion ...“

Cycle (Issue 03/2019 – *The best bicycle cleaners in practice*): 7 bicycle cleaners were tested. BikeClean has the best results in cleaning performance, handling and environmental compatibility. Conclusion: „The cleaner automatically dissolves dirt after a short application time...“

Bike Bild (Issue 3/2018 – *10 bicycle cleaners tested*): 10 bicycle cleaners were tested. BikeClean bike cleaner result: Fantastic cleaning performance, best spray pattern out of the tested cleaners. Conclusion: „If you rinse the product off properly, it's a dirt-vanishing miracle! The small bottle sits well in the hand, it is in the mid-price range and is perfect for impatient people (very short application time). Also good for chain oil and other lubricants.“

GTÜ (Issue 6/2018 – *GTÜ tests bicycle cleaners*): 10 bicycle cleaners were tested. BikeClean bike cleaner result: Recommended.

Mountainbike (Issue 2/2018 – *Liquid gold*): 16 chain oils were tested. BikeCer ceramic chain oil test result: Very good. Conclusion: „Ceramic is considered to be a very high quality additive. Ballistol's lubricity is very good ... Level. ... Attractively priced.“

Trekkingbike (Issue 4/2016 – *Muckraker*): 30 chain oils were tested. Result: BikeCer was rated very good and Bike-X-Lube was rated good (tested under laboratory conditions: lubricity, dirt adhesion, good flow and handling)

Stiftung Warentest (Issue 9/2015 – *Not afraid of filthy weather*): 18 impregnating sprays were tested. Quality rating for Biker-Wet-Protect: good. Good impregnating results and very good handling.

SILICONE-OIL

Area of application: To lubricate, protect and preserve rubber, plastic and metal parts. For suspension forks, pistons, dampers, joint connections and seals.

Advantages:

- High surface adhesion
- High silicone content and goes a long way
- Tested material compatibility for all components
- Plastic care (renews shine)
- Prevents drying out and becoming brittle
- Protects against moisture
- Eliminates squeaking and creaking
- No PTFE or acids and does not become resinous

PTFE DRY LUBRICANT

Area of application: Resistant and long-lasting dry lubrication for sensitive areas on bikes (e.g. suspension fork, damper and retractable saddle tubes).

Advantages:

- Adheres even to small surface irregularities
- Lubricates, protects and preserves
- Neither dirt nor dust adhere to treated areas
- Low-friction, reduces static, sliding and rolling friction
- No silicones or acids and does not become resinous

WATERPROOFING SPRAY

Area of application: Cares for and impregnates all textiles and suede used in cycling. Sports, functional and outdoor clothing are just as weatherproof as shoes, backpacks and camping equipment.

Advantages:

- Extremely water and dirt repellent coating
- For all natural and synthetic fibres and suede
- Every single fibre is coated in a clear, UV and temperature resistant, breathable protective layer

Note: Caution! Must be observed! Damage to health possible if inhaled! Only use outdoors or with good ventilation! Only spray for a few seconds! Large leather and textile products should only be sprayed outdoors and with good ventilation! Keep away from children!

STING-FREE

MOSQUITO REPELLENT

Area of application: Protects against gnats, ticks, and horseflies as well as tiger mosquitoes, mosquitoes, mopane flies, tsetse flies, sand flies and sand fleas.

Advantages:

- Effective for up to 8 hours (for ticks up to 4 hours)
- Highly effective protection due to combination of 20% icaridine and natural essential oils
- Pleasant fragrance and cooling effect
- Dermatologically and allergologically tested and rated as "Very Good" (Source: www.ballistol.de)
- Suitable for long distance travel and the tropics
- Contains essential oils with skincare properties

Note: You can find more information in our Stichfrei flyer. Not suitable for children under 2 years. Avoid contact with eyes or mucous membranes. Do not apply onto open wounds. Do not spray on plastic materials. Alcohol may make colours fade. May cause allergic reactions (contains D-limonene, linalool, bergamot and grapefruit oil). Use Stichfrei carefully. Always read the label and product information before use. Reg.no.: N-107649

Premium bicycle maintenance

for protection and care

Bicycle Cleaner: Intensive foam cleaner for the entire bicycle, including chain.

Chain Cleaner: Independently removes stubborn lubricant residues from bicycle chains, motorcycle chains, gear wheels, frames and rims.

Ceramic Chain Oil: Chain oil with extremely effective lubricating ceramic for chain, cassette, sprocket, suspension fork, damper and Bowden cables.

E-Bike Chain Oil: Specifically developed for e-bike chain requirements. Contains EP additive, adhesion additive and ceramic additive. Suitable as a contact oil.

Bicycle Care Oil: Care oil and contact spray for the entire bicycle. Extreme rust protection, even salt water resistant.

Silicone Oil: Lubrication, protection and preservation of rubber, plastic and metal parts

PTFE Dry Lubricant: Resistant and long-lasting dry lubrication for sensitive areas.

Waterproofing Spray: Breathable universal impregnation for all textiles and suede.

CHAIN CLEANER

Area of application: Independently removes stubborn lubricant residues from bicycle chains, motorcycle chains, gear wheels, frames and rims. It also automatically removes old lubricant residues between the chain links that cannot be reached with a cleaning brush.

Advantages:

- Fast, powerful cleaner
- Especially material compatible
- Neutral towards painted surfaces, chrome, aluminium and plastics, as well as rubber and carbon
- The corrosion inhibitors it contains effectively prevent rust formation
- Regular use also significantly extends the chain's mileage

BICYCLE CLEANER

Area of application: Intensive foam cleaner for the entire bicycle, including chain. Also suitable for your e-bike.

Advantages:

- Tested several times and found to be very good
- Thorough, residue-free cleaning
- Dissolves heavy soiling (e.g. encrusted sludge, dust, grease, oil residues, etc.)
- Even gets to hard-to-reach places
- Makes it more difficult for new dirt to stick
- High material compatibility (aluminium, chrome, carbon, anodised parts and matt paints)
- Fully biodegradable
- No silicones, acids or hydrocarbons

Note: Rinse thoroughly, do not allow to dry. Do not use in direct sunlight or on heated surfaces. Not suitable for high-gloss, unpainted aluminium. Do not forget to oil when cleaning the chain.

CERAMIC CHAIN OIL

Area of application: Developed especially for lubrication with extreme requirements on chain, cassette and sprocket. Also suitable for suspension forks, dampers and Bowden cables. Tried and tested for e-bike chains as well.

Advantages:

- Tested several times and found to be very good
- Contains ceramic additive to reduce wear and tear and therefore increase the bike chain's service life
- Reduces friction, displaces moisture
- Ensures smooth running characteristics
- Precise application
- Extends relubrication time thanks to strong adhesion
- Excellent corrosion protection, water-resistant, good flow, does not become resinous
- No silicones, PTFE or acids

E-BIKE CHAIN OIL

Area of application: Specifically developed for e-bike chain requirements. Extends battery life and mileage. Suitable as a contact oil for all current-carrying connections.

Advantages:

- Contains EP additive (= increased pressure resistance), adhesion additive (= low throw-off behaviour) and ceramic additive (= ensures dry-running properties)
- Increased creep capacity
- Highly adhesive with best lubrication performance
- Provides long-lasting protection against rust
- Displaces water
- Ideal viscosity
- Does not resinify
- Silicone and PTFE-free

E-BIKE
With EP additive

BICYCLE CARE OIL

Area of application: Care oil for the entire bike and e-bike. Lubricates the chain, cassette and sprocket. Superb for extreme conditions (e.g. snow, humid and salty air). For cleaning and removing grease, tar, rust and resins.

Advantages:

- Tested and recommended several times
- Low-friction, good flow, preserves, displaces water from metal surfaces, infiltrates moisture
- Extreme rust and corrosion protection
- Very good lubricating effect even with humid and salty air

- Contact spray
- Does not contain any waxes, does not become resinous and does not stick
- No silicones, PTFE or acids
